**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.50; non-GMO = \$3.50

**Test Comments:** *This location is a very uniform flat test site, planted in mid-late April. Cold, wet weather after planting affected stand of some products. A mild summer and good moisture helped to keep the yields high. At harvest, many of the products had dry plants and were beginning to defoliate, but the corn was still standing well. Some sporadic kernel disease was present but not a major concern.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
