**Test Comments:** *Good soil conditions while planting was followed by a very cold and wet week in Missouri. Reports of nearly 7" of rain challenged this site while seed was germinating. However, the crop came through and recovered nicely. Growing conditions were mostly good in season. Timely rains during pollination. August was cool. September quite dry. Zinc and foliar blend nutrients were applied.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
