**Test Comments:** *We lost a few plants during emergence, but after that the plot experienced fairly favorable conditions. Growing season added some good vegetative growth, producing plants up to 14 feet tall. Stalk quality was excellent at harvest. Some full-season hybrids still had green at the stalk base. Pollination was good as well, with ears nice girthy ears filled to the tip. This is a nice heavy bottom soil.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
