Test Comments: *Corn was planted late, but after that, this crop took off. Corn looked good all season long. A late wind storm a few days before harvest took some hybrids down. The lodging scores give a quality indication of stalk strength ratings. Despite the lodging, most of the corn did feed into the combine. Overall rating of the plot is a 8 out of 10, due only to the late storm. (10=Best)*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
