TEST COMMENTS: Roger was very pleased with his crop yields this year. He said most of his summer months were droughty with a few showers here and there, nothing huge. The soybean trial had excellent emergence and stands. Plant heights ranged from 36-42" tall. Seed size was moderately large (~2800 seeds/lb?). Waterhemp was present.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
