TEST COMMENTS: Jeff, our host farmer, mentioned it's been tough in this area. Either it was too wet early in the season, or too dry thoughout. "We just didn't get a lot of rain," said Jeff. The trial did well considering. Stands were uniform. In August, spider mites were seen on the field edges, not in the plots. No weeds were present at harvest. No diseases observed. Minimal lodging and average seed size noted.

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
