TEST COMMENTS: *We had good condtions at planting. Dry weather has dominated the growing season till July 24 when the rains started and helped fill out the beans. Some plant height variability but an average height of 36 inches on the higher ground that was a bit drier. Excellent weed control all year. Harvest condtions were good and bean moisture didn't vary much between maturities.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
