**Test Comments:** *This site has been corn on corn for over 5 years and produces very well. This site was hit by the wind storm that damaged the Winterset plot. Some greensnap, reflected in lodging scores, was found in the late-season test here. Ryan said that some area fields had 50% stand from greensnap. Plants were tall and healthy with well girthy ears. Some weak ear shanks but stalks were strong and upright.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
