**Test Comments:** *This was an excellent plot. Growing season was almost ideal the entire season. Roger stated, "This might be the best crop I have ever had." Stalk quality was still good, ears were hanging downward, and ear shanks were still solid. There was little evidence of yield limiting disease here. Ears were filled almost to the tip, with good girth and good kernel depth. Uniformity across the plot was good.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
