Test Comments: *The planting conditions were nearly perfect and dry. This location is slightly rolling and very similar to the surrounding area. The plant stand was very good with corn standing very well, even with the delayed harvest due to early October rainfall. Lodging was minimal and what was present was stalk lodging. There were a few small spots in the plot where greensnap was noted.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
