Test Comments: *This is a new FIRST irrigated corn site. The crop looked good all year, from planting to harvest. Surrounding non-irrigated fields had yield limiting drought stress this year. Approximately 6" of supplemental irrigation applied. UAN plus sulfur was applied through the pivot. Stalk quality was excellent and little disease at harvest. Good kernel depth. Zinc also applied. This was just a good trial.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
