Test Comments: *Droughty conditions did not relent. Howard, our host farmer, said of June/July, "too many days above 95 with limited moisture, 110 degree heat index, and nights in 80's for 15 days in row right at pollination. Everything combined arrested ear development. Nosed it back really hard." In August, this area was rated "Exceptional Drought" by NOAA/NWS. High stress here but some products endured.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
