**Test Comments:** Trial was planted within a day of surrounding field. Clean tests with crisp alleys took shape heading into summer. Hot and dry weather set in creating some stress. Brett, our host-farmer, said, "It forgot to rain" during a late summer visit. His father, Billy Joe, mentioned during harvest that corn yields were better than anticipated. Also, a narrow band of rain in mid/late July was extremely beneficial.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
