Test Comments: *Moisture was abundant in this part of the state for most of the season. 8.25" fell in June alone. Planting conditions at this no-till site were ideal and emergence was near perfect. Conditions for pollination in July were excellent. Plants appeared healthy except for the stalk lodging, resulting from sustained 60+ mph winds during October. Plants harvested well and provided great data quality.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
