Test Comments: *This site was planted into a clean seedbed and had very good emergence. Timely rains fell all growing season. Plants were tall with long ears that were filled to the end. Very little disease pressure observed. Harvest was delayed by wet weather. High winds had blown over some hybrids. Excellent weed control. Joe, our plot host, said corn in the area had been yielding right around 200 bu/acre.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
