**Test Comments:** *Early season rains delayed planting in this area until mid May. The plot had an excellent start and looked nice and uniform all season. At the midpoint of the growing season, ample amounts of rain fell on the area all the way through harvest. Stalk and ear quality were suffering due to all the moisture. Yield levels were excellent due to good pollination and a nice deep kernel set.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
