TEST COMMENTS: *This site was planted into a clean, tilled seedbed and plants emerged fast. Stand counts were very good. Late May, June and July brought very hot weather with spotty rainfall. August was cooler with some rain showers that really helped yield. Plants were tall and standing well at harvest.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
