TEST COMMENTS:

Like most farms in northwest Iowa, planting season was a challenge due to soggy weather that lead to narrow planting windows and frequent delays as soil dried. Early planted corn sat in saturated soils for an extended period which also had an impact on plant stands. From our May 4 planting date to June 1, this field received 7.4" of rainfall. August and portions of September were cool and slowed crop progress dramatically by nearly 10 days. Harvest progress reflects this delay as corn has been slow to dry in the fields.
