### TEST COMMENTS:

*This was a very nice location. Planted in the last week of April, it received a nice 1/2" of rain 2 days later. The plot looked really uniform at V5 and continued to get timely rains all season long. Some hybrids had some lodging issues due to high winds. There was some Tar Spot noticeable on the leaves, but not a lot. Jamin commented that he was having some field averages close to 275 bu/ac in the immediate area.*
