TEST COMMENTS:

This location was planted in nice soil conditions and had good emergence. Plentiful rains and heat made for nice growing conditions all summer long. Tar Spot along with GLS came in early August but didn't hurt the plot as bad as other fields we have seen. Nick says that the fungicide application really helped this year and can see a huge difference in areas they farm that didn't get the application. The plants in the plot were able to hold on a little longer, and it really shows.
