HARVESTED - STAND:	Nov 16 32.6 /A

TEST COMMENTS:

This location was planted in the third week of May and started out the growing season with excellent emergence. The plot had a very wet May and June but was below average for moisture in July and August. The site did have some sporadic weed pressure in the front and sides of the plot that may have affected some yield. The plot was standing well at harvest with good stalk strength with very little lodging.
