PEST MANAGEMENT:	Force, Stinger, Tripleflex, Round-Up, Callisto
FERTILITY - Applied N:	200 Sidedress, 20# sulfur
Applied N-P-K (units):	200-80-60

TEST COMMENTS:

This location had good conditions for planting this spring. Stand counts in June had consistent results and the plot was looking good. In August we scouted this plot and were surprised to see little drought stress and strong yield potential. A good clay soil base in the field helped to sustain yields in a drought year. At harvest, we saw higher stalk lodging scores that were associated with the variety. Great plot data and yield results at this location. The average yield of the trial is consistent with what the Browns saw in the rest of the field.
