TEST COMMENTS:

This location was very nice from start to finish. Ideal planting conditions, very good growing conditions and easy harvesting is how I would explain this plot. Plants were tall and filled with large pods all the way to the top of the plant. Three and four pod clusters were seen in most varieties starting a few inches off the ground and continuing to the top. Seed size was large throughout most of the plot. Lodging did occur, likely from large amounts of vegetative growth. As a whole, a very nice looking location.
