TEST COMMENTS:

The plot was planted in early May as corn-on-corn. Soil conditions were good but it was a little cloddy, and a rain 4-5 days later helped mellow things out. June was fairly dry, but the corn was nice and uniform at V5 stage. There was still some green in the full-season hybrids more than likely due to a fungicide application. The plot was nice and uniform throughout. Ear placement was fairly low on the plants, but they were filled out almost to the tip on most hybrids.
