### TEST COMMENTS:

Watseka was planted in near-perfect soil conditions and had near-perfect emergence. At the time of stand counts this plot looked amazing, especially compared to some surrounding areas planted so late due to a very wet spring. On June 25 a large storm went through this area with strong winds and hail. At first, Lindon said thought approximately 25% of the leaves were damaged from hail, and some large areas of the plot were laid over including some green snap. By July 2 most everything had recovered, but had minor to a bit more heavy goose necking. With all that this location went through before pollination, it performed amazingly and had very strong yields.

Watseka was planted in near-perfect soil conditions and had near-perfect emergence. At the time of stand counts this plot looked amazing, especially compared to some surrounding areas planted so late due to a very wet spring. On June 25 a large storm went through this area with strong winds and hail. At first, Lindon said thought approximately 25% of the leaves were damaged from hail, and some large areas of the plot were laid over including some green snap. By July 2 most everything had recovered, but had minor to a bit more heavy goose necking. With all that this location went through before pollination, it performed amazingly and had very strong yields.
