### TEST COMMENTS:

*This location was planted in early May in a very nice strip-tilled seedbed. Timely rains early in the season gave very even and uniform emergence across this location. Mid-season heat with good showers mixed with Al's corn program this year made for an exceptional plot. Tall healthy plants with little to no foliar disease present produced large girthy ears filled out. Plants were standing great and had excellent stalk quality, with many varieties still having a fair amount of green from the ear down, more so in the full-season hybrids. Overall a great location with a great grower!*
