The Jackson site was planted in good condition. Steve told me that, "we started this year in a drought, had too much rain from mid-April through June, and have ended the season in very dry conditions again". The lack of rain and warm temperatures in September and October caused the corn (and soybeans) to dry down much faster than anticipated. The corn in this plot stood very well at harvest. Steve reported rainfall this year as: 4.25" in April, 8.19" in May, 8.94" in June, 1.79" in July, and 2.18" in August -- 25.35" in those months.
