### TEST COMMENTS:

*In the hills outside of Wayne on the Anderson farm, rain was an issue early in the spring for planting. This is another site where a small window allowed us to get in and it literally started to rain on our last planting pass. Once again, emergence was uniform and good. Steady rains kept up throughout the season giving the plants ample moisture to make a great dryland yield. This is a nice contrast from the prior year where drought limited yield potential.*
