### TEST COMMENTS:

*This strip-till field had excellent soil conditions at planting time. Rudy told me that he had over 10" of rain between the middle of May and the end of June. He credits the good yields here to extensive drainage tile in his fields. Rainfall was just above the 10-year average during the whole growing season. Dry and warm weather in Sept and Oct helped the corn to dry down with very good plant health. Rudy also stated that he was pleasantly surprised by his yields, considering the excess rain in the early growing season.*
