HARVESTED - STAND:	Oct 9 127.7 /A

TEST COMMENTS:

This is a uniform location with a history of producing good data and big yields. The site was planted at the beginning of May and had a good start with emergence and moisture. Good fertility, good weather, good drainage, and a full growing season led to big yields at this site. Plants were healthy and standing well at harvest with a good bean size, but were on the dry side.
